

SEWER CUSTOMERS AND CUSTOMERS WITH GRINDER PUMPS

In case of Town wide emergencies, like a hurricane, you should follow emergency directions including those to evacuate.

If electrical service is interrupted, so is your Grinder Pump service.

The Grinder Pump requires electricity to operate. Follow these tips for reducing wastewater

- In case of a power outage you should conserve your water use.
- Flush only when necessary and refrain from using showers and sinks.
- Use a closed basin for washing and discard the water outside.

Illegal Sump Pump Connections may cause surges the system cannot handle and cause sewerage to backup into your properties.

Disconnect all sump pumps from the sewer system.
